**Subject:** Questions

Linda, Victor pushed back our call to 10:30, and I just finished with him, so I'll go ahead and send you my questions and hopefully we can catch up later today.

1) **Vasquez Boulevard-Interstate 70 (VB/I-70):** We will be initiating a new phase of remedial action at this site to clean up smelter related wastes from residential yards. We will be utilizing the Army Corps of Engineers through an Interagency Agreement to perform the work, which will include XRF and soil sampling for metals prior to initiating removal and restoration activities. We have an existing QAPP from the Corps from earlier phases of this same work, and **we need to find out the level of review required for this QAPP and the time frame for completing this review.** We would like to initiate the XRF and soil sampling activities as early as possible during this upcoming field season.

**Other Sites--Enforcement/Investigatory / Ex. 7(a)**

Thanks,  
Steve
